

Acme Corp ? Software Engineer Job Description

Role: Software Engineer (Backend)

Location: Bengaluru, India (Hybrid ? 3 days in office)

Employment type: Full-time

About the role

You will build and maintain APIs that power Acme's document products.

You will work with Next.js services, Postgres, and vector search systems.

Minimum qualifications

- 2 years of professional software development experience
- Strong proficiency in TypeScript or JavaScript
- Experience with REST APIs and relational databases (PostgreSQL preferred)
- Bachelor's degree in Computer Science, IT, or equivalent practical experience

Acme Corp ? Software Engineer Job Description (continued)

Preferred qualifications

- 3+ years of experience building production backend services
- Hands-on AWS experience (S3, Lambda, or ECS)
- Familiarity with embeddings, vector databases, or RAG systems
- Experience with Prisma or similar ORMs

Responsibilities

- Design, implement, and test backend features end-to-end
- Improve retrieval quality and reduce hallucination risk in Q&A flows
- Participate in code reviews and on-call rotations
- Write clear technical documentation for your services

Compensation

Base salary range: INR 18,00,000 to INR 28,00,000 per year, depending on experience.

Benefits include health insurance, 18 days paid leave, and a learning stipend of INR 25,000/year.

How to apply

Email careers@acme.example with subject line: SE-Backend-2026

Include resume and a short note about a backend project you shipped.
